

Q&A about Central Utah Coal Activity

How many active mines in Utah?

How many are coal?

How much do they produce?

How much of the production comes from Murray mines?

What are the names of the Murray mines? Are they all coal?

Response:

There are about 600 + permitted mines in Utah. Thirty four of them are Coal Mines. Of those 34, 10 are underground coal mines that are actively producing coal. Three mines are surface mining coal from coal waste piles. The remaining coal permits are coal processing plants or inactive or in reclamation. All of the Murray (UEI) are coal mines.

The ten active underground coal mines are:

1. Skyline Mine, Canyon Fuel, Carbon County;
2. **Centennial Mine (Aberdeen, Pinnacle), UEI (Murray), Carbon Co., 2.111M tons for 2006;**
3. Horizon Mine, Hidden Splendor Mining, Carbon Co.;
4. Dugout Canyon Mine, Canyon Fuel, Carbon;
5. **West Ridge Mine, UEI, Carbon Co, 3.098M tons for 2006;**
6. Emery Deep, Consol, Emery Co.;
7. Deer Creek Mine, Energy West Mining, Rocky Mntn Power, Emery Co.;
8. Bear Canyon Mine, CW Mining (Co-op mines), Emery Co.;
9. **Crandall Canyon Mine, UEI & IPA (LA Power and Water), Emery County, 1.372 M tons for 2006;**
10. SUFCO Mine, Canyon Fuel, Sevier County

Additional information:

An inactive mine held by **UEI** is the Horse Canyon Mine. OGM just approved a major extension to this mine, called the **Lila Canyon Extension**. It is not yet active. It is under appeal by the Southern Utah Wilderness Alliance before the Board of Oil, Gas and Mining.

More information can be found on OGM's web page with a description and maps of each coal mine permit. <http://www.ogm.utah.gov/coal/Default.htm>

Also, coal production is catalogued by UGS and is on their website.

INFORMATION NOTICE
AVAILABILITY OF UTAH COAL MINING PROGRAM PUBLIC RECORDS

DIVISION OF OIL, GAS, AND MINING
1594 WEST NORTH TEMPLE, SUITE 1210
BOX 145801
SALT LAKE CITY, UTAH 84114-5801

Types of Public Records Available in the Utah Coal Program

New permit applications (administratively complete)
Significant revisions (administratively complete)
Permit Renewal, Application Mining and Backcheck Plans
Permits
Permit changes
Permit transfers
Copies of records, correspondence, reports, inspection materials, or information obtained by the Division through inspection

When and Where are Public Records in the Utah Coal Program Available?

- New present applications will be taken from revenue applications, and permit new permit applications that have been previously administratively complete must be filed in the county or courthouse in the county when the time is located during the period of the permit. The county administratively complete permit must be available for public review for the comment period.
- **(DNR) The public comment period begins when the Division notifies the permittee by letter that the public review has been taken from administrative complete. The permittee then publishes the notice of the public review in a newspaper of general circulation in the county for five consecutive days. The 30 days of the notice to support public review, written comments or objections to the action of the Division, must be submitted to the Division.**
 - **Permit Change Application and Permit Transfer Applications are available during the permit change and permit transfer period of the Division of Oil, Gas, and Mining at Salt Lake City.**
 - **Aggregated permits are available for public review everyday during business hours in the Public Information Center (PIC) at the Division of Oil, Gas, and Mining at Salt Lake City.**
 - **Copies of records, reports, inspection materials, or statements submitted by the Division during permit applications are available upon request, except in the case of an effect of the public review, and the public review period is available for public review, except in the case of an effect of the public review, and the public review period is available for public review, except in the case of an effect of the public review.**
